

Rohit Sharma

Full-Stack (MERN) Developer

+91 9610781347 | rohitsharma220401@gmail.com | Open to Remote / Relocation

Professional Summary

Full-Stack Developer with more than 2 years of experience building scalable, production-grade web applications using MERN Stack. Strong background in end-to-end development, designing modular architectures, and delivering systems used by real business teams in product environments.

Programming Languages

JavaScript, TypeScript, Python, ML

Frameworks & Technologies

React, Node.js, Express.js, MongoDB, MySQL, Git

Professional Experience

QDegrees Services – MERN Stack Developer (May 2024 – Present)

Development of multiple customer-facing products, delivering scalable web Applications. Improved system reliability, optimized performance, and ensured smooth production releases.

Key Projects

Sales & Field Operations Platform - MittsureOne

Tech: React, Node.js, MySQL

Designed and delivered web and mobile applications that optimized route planning, visit tracking, and approvals, improving productivity of field sales teams.

Survey Management & Feedback System - doyoursurvey

Tech: React, Node.js, MongoDB

Implemented a survey and feedback system enabling real-time collection of NPS and CSAT data, helping business teams make data-driven decisions.

Activity Management Platform – Klubba

Tech: Angular, Node.js, MongoDB

Develop a scalable sports activity platform supporting schools and academies, reducing manual coordination and enabling phased feature rollouts.

Holistic Wellness Platform - VedicHealth

Tech: React.js, Node.js, MongoDB

Ayurvedic wellness platform offering consultations, bookings, and product management for users and practitioners.

Education

Masters in Computer Application (Artificial Intelligence and Data Science) – Poornima University (2022 – 2024)
